NORWICH BULLETIN, TUESDAY, SEPTEMBER 22, 1909.
Dr. E. O. Taylor Gave the Scientific Phase of the Alcohol
Question to a No-License Meeting at Y. M. C. A. Hall.

The scientific phase of the alcohol
question, or science vs. the saloon,
was treated in a comprehensive way
Monday night at Y. M. C. A. hall by
Dr. E. O. Taylor of Boston university,
speaking under the auspices of the
no-license committee. The rainy night
had a pronounced effect upon the at-
tendance as there were more than
25 men in the hall, but Dr. Taylor
spoke just as earnestly and enthusi-
astically as if before an audience of
hundreds. He was introduced by Rev.
P. C. Wright of the no-license com-
mittee, who mentioned that Dr. Taylor
had recently attended in London the
world congress on alcohol.
For lack of knowledge of the na-
ture of alcohol, said Dr. Taylor, there
were 160,000 of our citizens destroyed
each year. It is alcohol which is the
one and only thing in the world which
ingestive beverages which makes them
what they are and for which man drink
them. It is the alcohol which "touches"
the spot. This is not a question of
beer against whiskey, nor a question
of the abuse, nor of adulteration, for
the pure stuff in its nature is devilish.
This is purely an alcohol question.
What is temperance or intemperance?
This is the only way in which it can
be settled right. When science all
over the world declares against alcohol,
we have got to regard its voice
whether we like it or not.
Dr. Taylor then proceeded to show
that alcohol comes from nature, in-
cluding different kinds of alcohol, such
as wood alcohol, fuel oil, and the alcohol
found in rancid butter and old cheese,
all deadly poisons, but not used for
beverages. The only alcohol which is
commercial, or ethyl alcohol, which is
used for beverages. This comes from
sugar, and if all the sugar were re-
moved from the world there would be
no alcohol, but there is not a molec-
ule of alcohol in all the sugar God
ever created, and no one should ex-
pose his ignorance, as the Little
Rock bishop did, by arguing that be-
cause sugar is good to eat and alcohol
comes from sugar, that there-
fore alcohol must be good to drink.
It is produced from sugar, but it is
germs which draw out the oxygen of
the sugar in barley, throwing off car-
bonic acid gas and alcohol, which is
thus the excrement of the yeast germ.
We are a long way past calling al-
cohol a food. The food value of al-
cohol was exploded twenty years ago.
Professor Atwood worried himself
to his grave trying to prove the food
value, but all the scientists of the
world were on the other side, and at
the alcoholic congress in London there
was not a dissenting voice. The pa-
pers indicating that alcohol had any

EMPLOYEES LEAVE JOB
BECAUSE OF NO WAGES
Unfortunate Delay of Mystic School
House Being Built by A. N. Car-
penter.
On Saturday it was stated by Com-
mittee member Joseph Cooper of the
Mystic school district, where a new school
house is being erected by A. N. Car-
penter, that the men on the job had
quit work, and that matters were
to be taken up with the bondaman
regarding the completion of the job,
which it is hoped can be done in ten
days.
The trouble is all due to the fact
that the carpenter, under the em-
ploy of A. N. Carpenter, the contrac-
tor for the job, have been held up for
about two weeks for their weekly pay.
When they saw that it was not forth-
coming on Saturday they stopped
work, refusing to continue for the reason
that they had heard that their
employer was somewhat embarrassed
financially, until the arrears in wages
were forthcoming. It seems there
have been delays in the work, and in
getting word enough to finish the
floors in the first corridor, the only
part of the carpenter work, except a
few minor details, which had been
completed.
There is considerable red tape to be
gone through with before the job can
be finished. The building committee
of the district has notified the bond-
ing company, the American Surety Co.
of New York, which has furnished
the bonds for Carpenter for \$7,500, of
the condition of things and they at
once sent their Woodford of
Hartford, their representative for this
section. Acting with him as repre-
sentative of the company steps were
taken whereby the committee could
engage to get the work done by an
other contractor. According to the
terms of the contract there was noth-
ing to be getting the job finished until
the bonding company had been notified
and they in turn had arranged mat-
ters with Mr. Carpenter.
This delay costs the district a very in-
opportune time, as the work was within
two or three days of completion. The
heating, plumbing and electric fixtures
contractors are continuing the work
of the work without interruption and
will be through in a few days.

Mrs. Nelson Trautritt Return to
Granby Monday—Other Mention.
An unusually large attendance of
relatives and friends were present at
the funeral of Bernard Hasler, held
Monday morning at his home, No.
18 South A street. At the Sacred
Heart church at 9 o'clock Rev. Arthur
O'Keefe celebrated a mass of requiem
and during the services some were
presented with flowers. The bearers
were John and Timothy Sullivan, Wil-

were many beautiful flowers. The burial

Mr. Hasler has been a resident of
Taftville for 28 years. For the past
ten years he had retired from ac-

a man of kindly disposition and
was well known and respected. He
was a member of a organization.
Before coming to Taftville he lived in
Willimantic four years, and in Baltic
for nearly 20 years. In Willimantic
he married Abbie Sheshaun, who sur-

The Raincoat!
A Raincoat is a "jack-of-all-trades."
It looks misty, you slip into your
Raincoat. If it turns to rain — well
and good — and if it clears up — all
right. Your Raincoat is as dressy as
any light-weight Top-coat you could
wear.
Our Raincoats are "Priestly Grav-
ettes." Priced \$10. to \$20.
Come in and see the new Kenyon
"GABARDINE" and the "LONDON
SLIP-ON" Raincoats.
Other new styles are the MUTO-
COAT, a patented convertible collar-
and the PRESTO, done by just a turn
of the wrist.
We have them.
